- Developed multiple web sites and applications.

- Worked as a volunteer for the FBK (Anti-Corruption Foundation). Had to work on (at times extremely) tight schedule and find solutions for complex, nontrivial problems.

- Built a Grunt-based template assembling tool for the proprietary landing page generator.

- Consulted clients on front-end performance and accessibility.

February 2008 — March 2014

Digital-agency Spider Group

January 2012 — March 2014

Senior Front-end Developer

- Developed multiple web sites and applications. Including high traffic e-commerce site.

- Developed user interface for the e-commerce iOS app from scratch.

- Prototyped and developed UI for several expo booths.

- Was responsible for setting up front-end development workflow. Built several tools for automating development process.

- Consulted co-workers and clients on all matters concerning front-end development.

- Gained some experience in project management and native development for the iOS and Android.

February 2008 — January 2012

Front-end Developer

- Developed multiple websites using several different content management systems (PHP, Python).

- Worked on a high traffic regional information portal.

- Participated in development of interactive expo booths.

- Created numerous marketing e-mail templates.

December 2006 — August 2007

Kuban Internet Company

Front-end Developer

- First professional steps as a fulltime employed front-end developer.

- Developed multiple websites using an in-house CMS (Perl).

- Briefly worked on two high traffic web projects — regional news portal and social networking site.
